GBX20 Firmware Release Notes

Table of Contents

FIRMWARE VERSION 1.0.1.12

PRODUCT NAME

GBX20

DATE

10/20/2023

FIRMWARE FILE INFORMATION

- Firmware file name: gbx20fw.bin

  MD5: 9919fd1647b5f8e4aa959d888d880f16

ENHANCEMENT

- Added ability to modify the GBX20's font size while connected to GRP261x

BUG FIX

- Fixed issue where you couldn't access the GRP261x's Web UI while connected to GBX20 if connected to a lower than default MTU environment

- Fixed an issue where HTTPS upgrading failed if "Validate Server Certificates" is enabled

FIRMWARE VERSION 1.0.1.9

PRODUCT NAME

GBX20

DATE

02/21/2023

FIRMWARE FILE INFORMATION

- Firmware file name: gbx20fw.bin

  MD5: acda8f8ab297cd353f4756721fd1b82e

BUG FIX

- Fixed issue where Hebrew characters weren't being displayed properly

- Fixed issue where GBX20 couldn't perform firmware upgrades using a server with a domain name

- Fixed issue with Active MPK page where it would display the page number on the bottom instead of "A" for active

- Fixed issue where BLF LED wasn't blinking correctly when monitoring a parked call
