# FIRMWARE VERSION 1.0.1.5

## PRODUCT NAME

GSC3505/GSC3510

## DATE

01/20/20

## FIRMWARE FILE INFORMATION

- Firmware file name: gsc3505fw.bin
- Firmware file name: gsc3510fw.bin

MD5: b7df8ddb9a5e9afbd772bb3e3d235a9e

## CHANGES SINCE FIRMWARE VERSION 1.0.1.3

### ENHANCEMENT

- Added the incoming rules options for each account [INCOMING CALL RULES FOR EACH ACCOUNT]
- Added Call Settings and Ringtone Settings for each account on GSC3505
- Added the missed calls notification on Web UI
- Added the error message for WPA/WPA2 password requirement
- Optimized the audio quality and improving the duplex algorithm
- Optimized some P-values that are not working on previous firmware

### BUG FIX

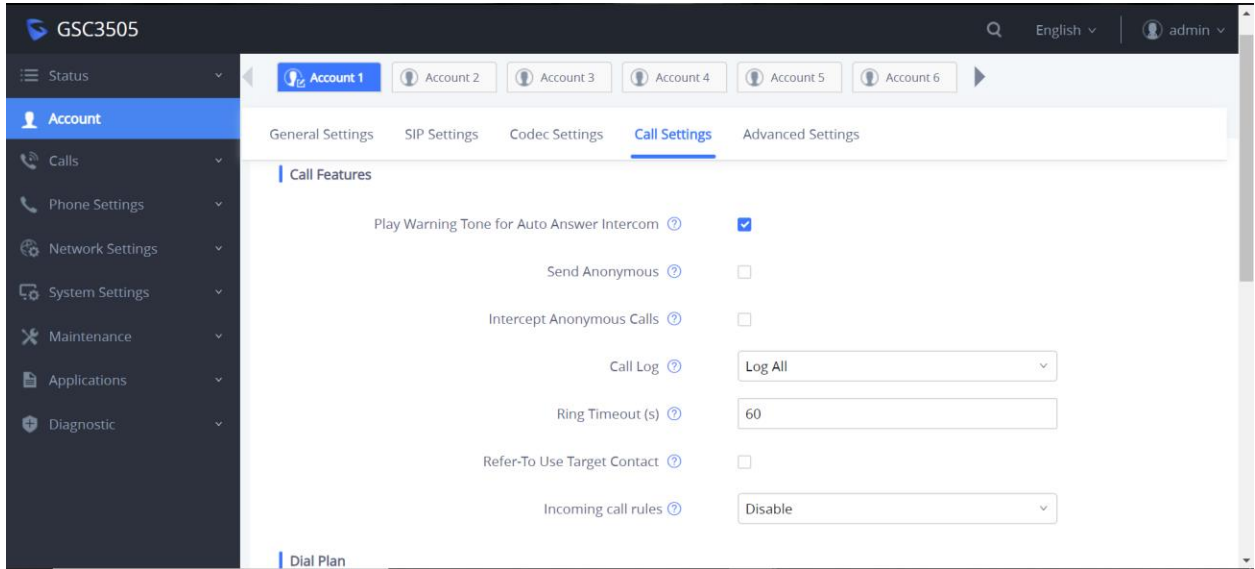

- Fixed ring back tone issue when there is a password set for an incoming call
- Fixed P-value for provisioning blacklist and whitelist through Web UI
- Fixed the abnormality of the call waiting behavior
- Fixed some call waiting and call waiting tone issue
- Fixed LED status lights issue
- Fixed some Portuguese incorrect translation

## NEW FEATURES OVERVIEW

This section lists major new features and describes how to use it from the user's point of view.

### INCOMING CALL RULES FOR EACH ACCOUNT

- **Web Configuration**  
This option can be found on the web UI under Account → Account# -> Call Settings -> Incoming Call Rules.

- **Functionality**

Allow to set incoming call rules for each account registered. This configuration will over rule the global incoming call rules.

- **P-Value**

| P-Value | Description                    | Value Range   | Default |
|---------|--------------------------------|---------------|---------|
| P60044  | Incoming Call Rules            | 0, 1, 2, 3, 4 | 4       |
| P60045  | Incoming Call Rules – Password | Numbers Only  |         |

# FIRMWARE VERSION 1.0.1.3

## PRODUCT NAME

GSC3505/GSC3510

## DATE

01/02/20

## FIRMWARE FILE INFORMATION

- Firmware file name: gsc3505fw.bin
- Firmware file name: gsc3510fw.bin

MD5: 3844a6e1e043e61e87ae492a7766ecfa

## CHANGES SINCE FIRMWARE VERSION 1.0.1.1

### ENHANCEMENT

- Added to support failover mechanism based on DNS SRV [REGISTER BEFORE DNS SRV FAIL-OVER]
- Added the ability to delay the auto-answer [AUTOMATIC ANSWER RINGING TIME]
- Added the ability to adjust the Busy Tone Expiration [BUSY TONE EXPIRATION]
- Added a timeout when the Visible to nearby Bluetooth devices is on [BLUETOOTH VISIBILITY TIMEOUT]
- Added the option to Enable/Disable the HTTP access [ENABLE/DISABLE HTTP ACCESS]
- Added the ability to disable IP2location and Wifi Certification [ENABLE/DISABLE DNS SERVER QUERY]
- Added the ability to play/stream the music based on set schedule [AUTO MODE PLAY TIME]
- Added the ability to display date/time on the Web UI
- Added the ability to provision the audio level settings
- Added the ability to support MP3 Format files on the Music Feature
- Optimized some P-values that are not working on previous firmware

### BUG FIX

- Fixed some call history issue that won't show after awhile
- Fixed Bluetooth PIN mismatching when pairing with GXP
- Fixed the Bluetooth Codec negotiation to support broadband (mSBC)
- Fixed the IPv6 issue when only enabling IPv4 only
- Fixed incorrect Time zone for "São Paulo" to UTC-3
- Fixed hold the SIP call when there is an incoming call from connected Bluetooth devices
- Fixed RTSP stream will not resume after receiving a call
- Fixed RTSP address cannot be saved when it's not in the correct format
- Fixed Dropping a call when there is a second incoming call

- Fixed the TR069 settings when configured
- Fixed Bluetooth lost connection with GVC after rebooting the GVC
- Fixed some Bluetooth configuration issue after reboot

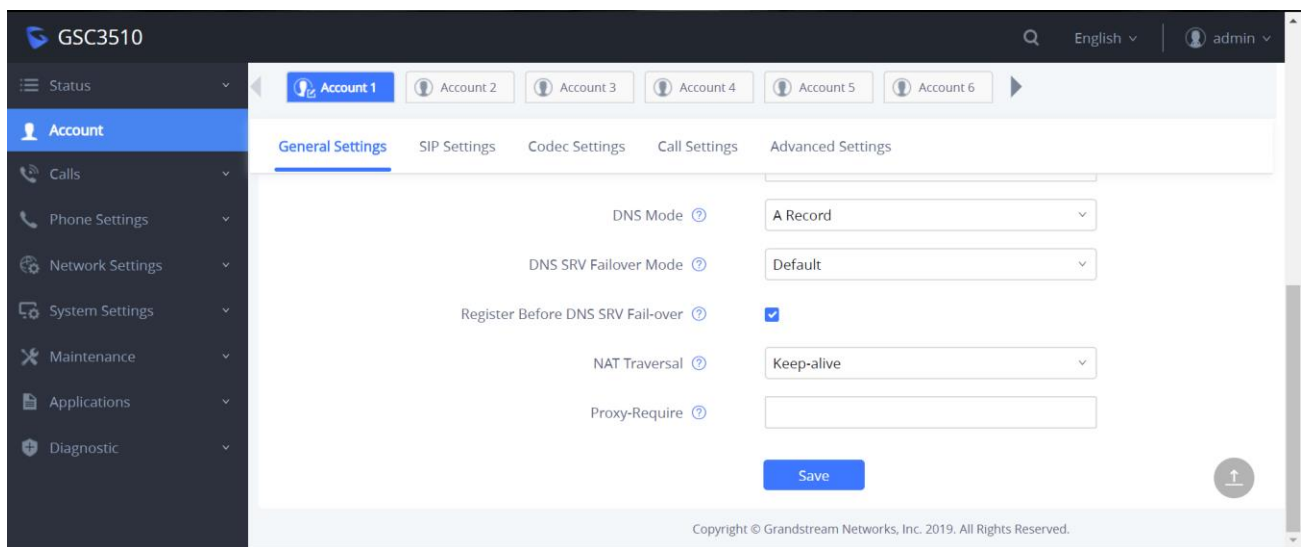

## NEW FEATURES OVERVIEW

This section lists major new features and describes how to use it from the user's point of view.

### REGISTER BEFORE DNS SRV FAIL-OVER

- **Web Configuration**

This option can be found on the web UI under Account -> Account# -> General Settings -> Register Before DNS SRV Fail-Over.

- **Functionality**

When this feature is enabled, the device will register using the outbound proxy when the SIP server is failed to get the registration.

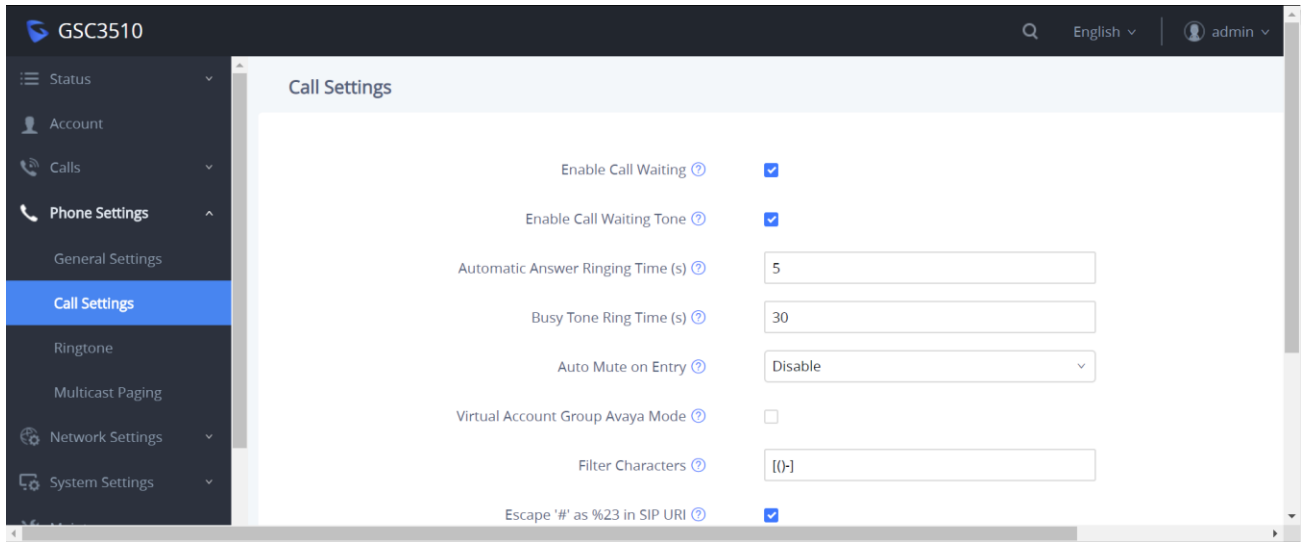

- **P-Value**

| P-Value  | Description   | Value Range | Default |
|--|---|-------------|---------|
| P29095, P29195, P29295, P29395, P29495, P29595, P53695, P53795, P53895, P53995, P54095, P54195, P54295, P54395, P54495, P54595 | Register Before DNS SRV Fail-over for each account# | 0, 1        | 1       |

### AUTOMATIC ANSWER RINGING TIME

- **Web Configuration**

This option can be found on the web UI under Phone Settings -> Call Settings -> Automatic Answer Ringing Time.

- **Functionality**

Allow the GSC to ringing for some specific time (in seconds) before auto-answering the incoming call when the Greylist set to Auto-Answer.

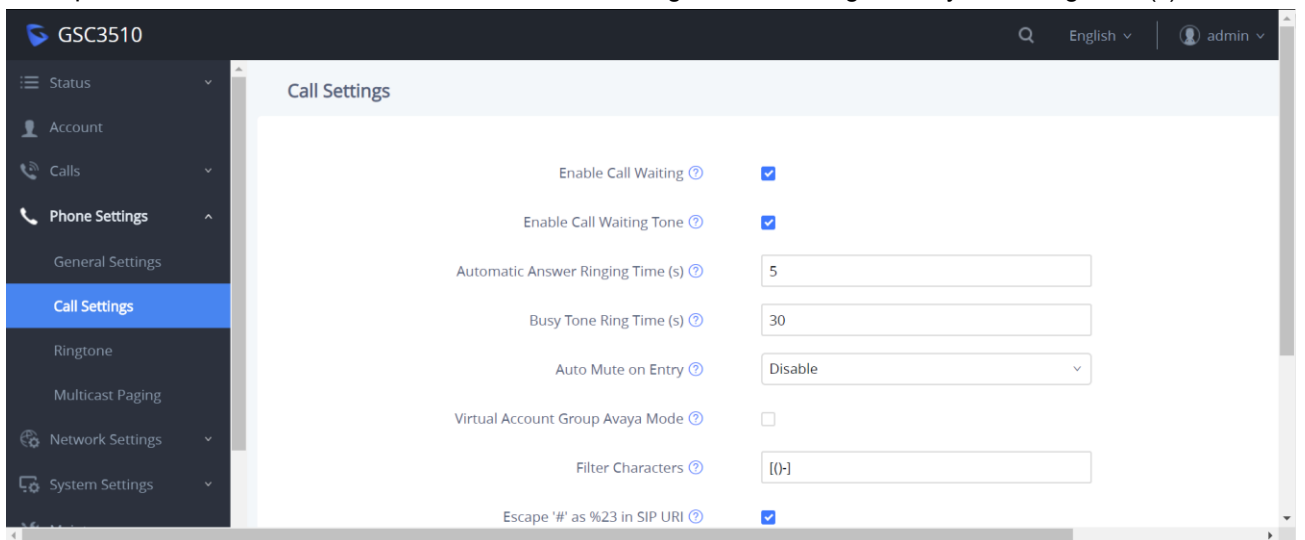

- **P-Value**

| P-Value | Description                   | Value Range      | Default |
|---------|-------------------------------|------------------|---------|
| P8486   | Automatic answer ringing time | 0 – 60 (seconds) | 5       |

### BUSY TONE EXPIRATION

- **Web Configuration**

This option can be found on the web UI under Phone Settings -> Call Settings -> Busy Tone Ring Time (s).

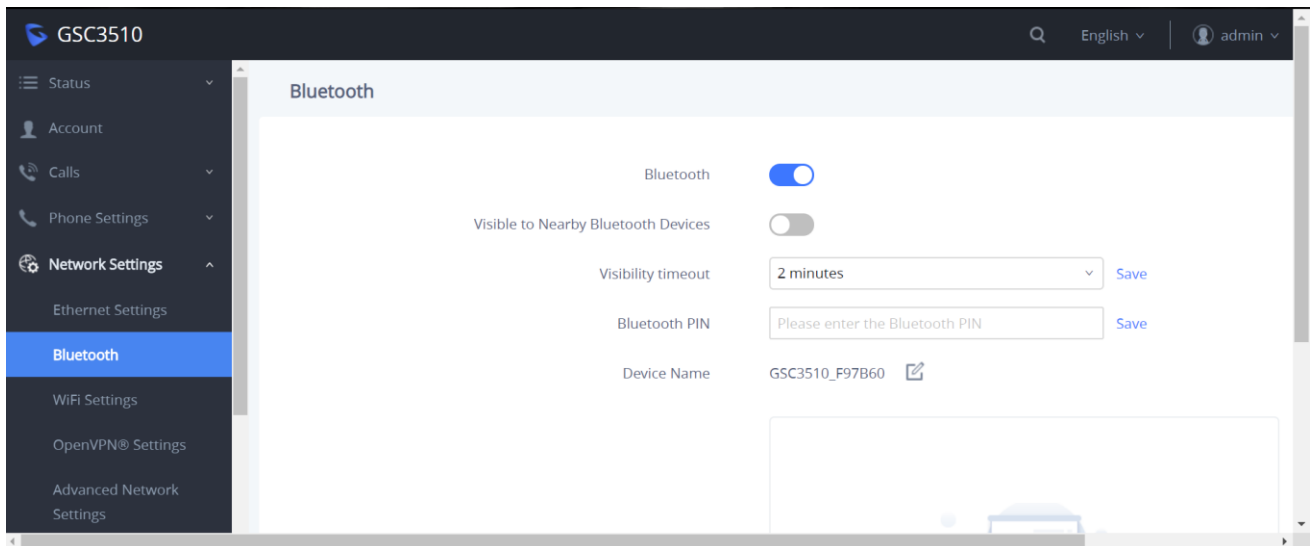

- **Functionality**  
Configure the timeout for Busy Tone during the call.
- **P-Value**

| P-Value | Description             | Value Range | Default |
|---------|-------------------------|-------------|---------|
| P8347   | Busy Tone Ring Time (s) | 0 – 120     | 30      |

## BLUETOOTH VISIBILITY TIMEOUT

- **Web Configuration**  
This option can be found on the web UI under Network Settings -> Bluetooth -> Visibility Timeout.

- **Functionality**  
GSC3505/GSC3510 added some options for Bluetooth Visibility timeout before the it turned back to 'Invisible' mode.
- **P-Value**

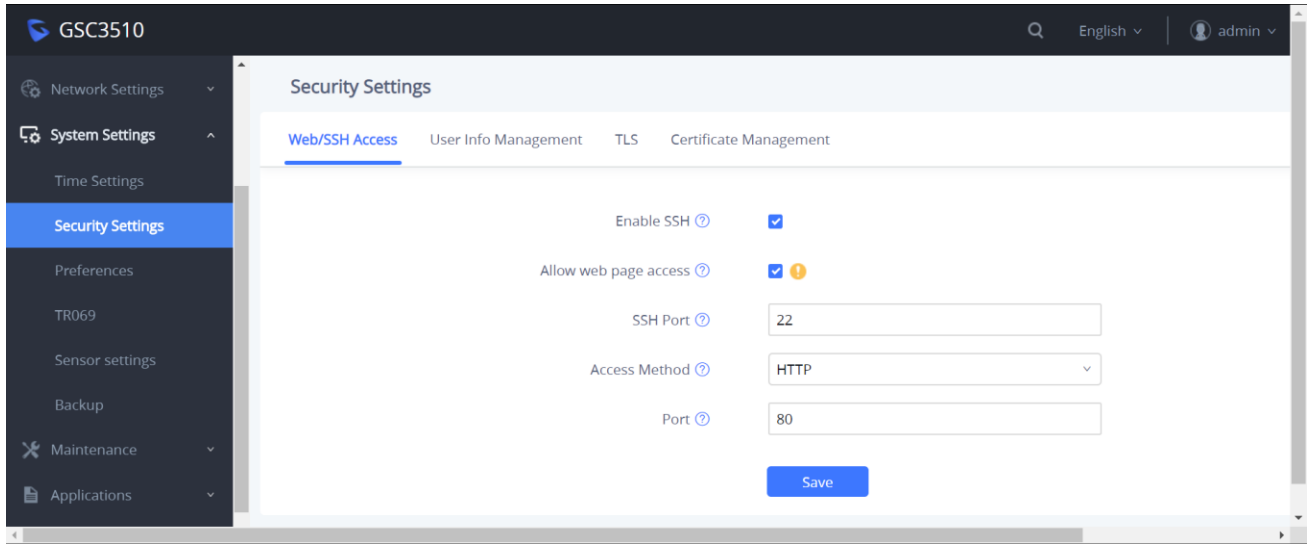

| P-Value | Description                  | Value Range | Default |
|---------|------------------------------|-------------|---------|
| P22331  | Bluetooth Visibility Timeout | 0, 2, 5, 60 | 2       |

## ENABLE/DISABLE HTTP ACCESS

- **Web Configuration**

This option can be found on the web UI under System Settings -> Security Settings -> Web/SSH Access -> Allow Web Page Access.

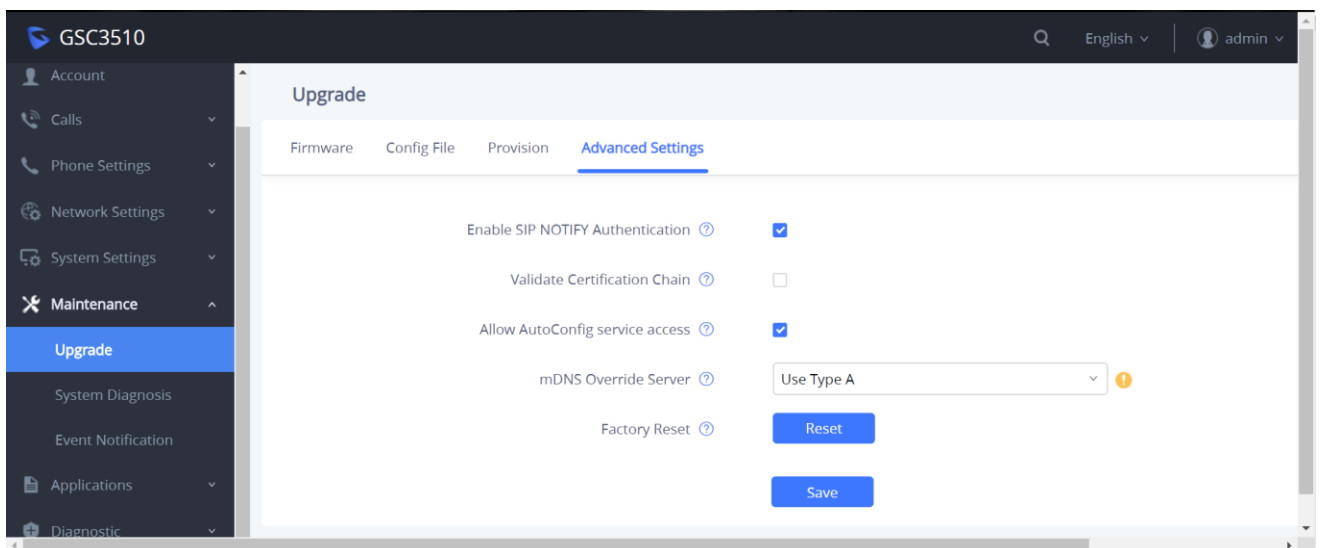

- **Functionality**  
Enable/disable the HTTP Access.
- **P-Value**

| P-Value | Description           | Value Range | Default |
|---------|-----------------------|-------------|---------|
| P29605  | Allow Web Page Access | 0, 1        | 1       |

#### ENABLE/DISABLE DNS SERVER QUERY

- **Web Configuration**  
This option can be found on the web UI under Maintenance -> Upgrade -> Advanced Settings -> Allow AutoConfig service access.

- **Functionality**

Options to enable/disable to access the AutoConfig service from service.ipvideotalk.com

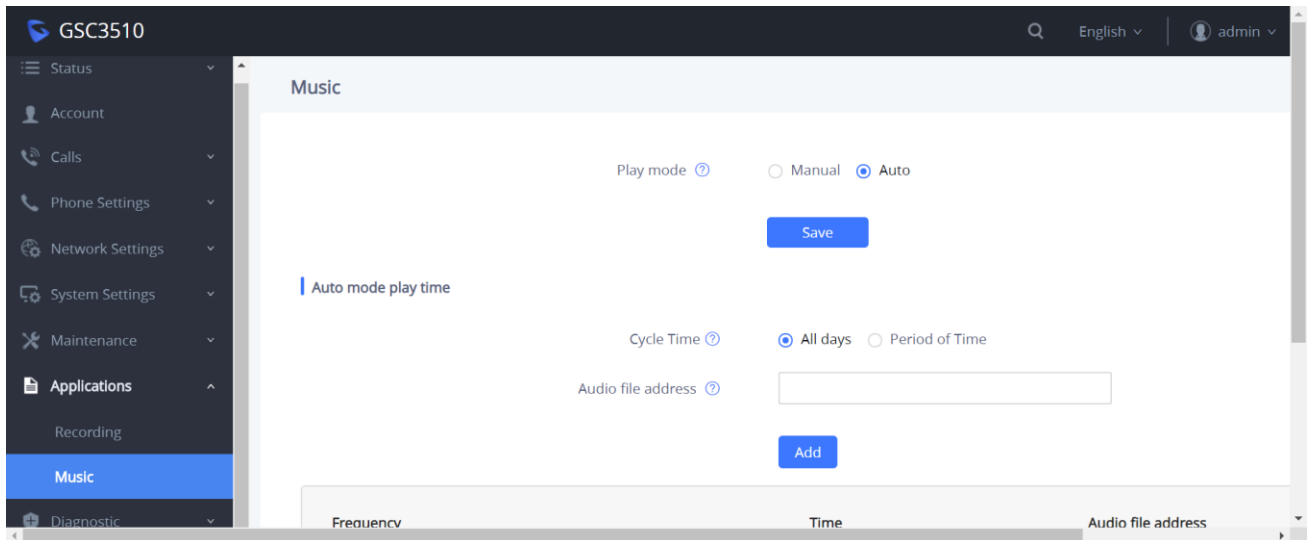

- **P-Value**

| P-Value | Description                     | Value Range | Default |
|---------|---------------------------------|-------------|---------|
| P7070   | Allow AutoConfig Service Access | 0, 1        | 1       |

### AUTO MODE PLAY TIME

- **Web Configuration**

This option can be found on the web UI under Applications -> Music -> Auto Mode Play Time.

- **Functionality**

To set some schedule to play/stream the music during Auto Mode.

# FIRMWARE VERSION 1.0.1.1

## PRODUCT NAME

GSC3505/GSC3510

## DATE

9/24/19

## FIRMWARE FILE INFORMATION

- Firmware file name: gsc3505fw.bin
- Firmware file name: gsc3510fw.bin

MD5: 91a540eb5b2777c810d9bf06536e66fa

## CHANGES SINCE FIRMWARE VERSION 1.0.0.24

### ENHANCEMENT

- Added the ability to stream Radio/Music on the device. [MUSIC/RADIO STREAMING]
- Added pairing PIN code with Bluetooth device. [BLUETOOTH PIN CODE]
- Added minimum & maximum TLS version. [MIN/MAX TLS VERSION]
- Added a prompt to restart the device after modifying PNP (3CX) Auto Provision
- Added an ability to adjust the volume during playing the radio/music
- Changing “DATE” for the time display under call history and recording files to “TIME AND DATE”
- Optimized web UI prompts
- Optimized the audio quality

### BUG FIX

- Fixed the calling prompt after ended the call from GVC when connecting using Bluetooth
- Fixed the inconsistency the volume during an active call
- Fixed the duplication issue when adding the numbers to the whitelist/blacklist
- Fixed adding a contact from the call history if the contact already existed in contact list
- Fixed call history does not refresh automatically
- Fixed unable to save the audio file address when editing both audio file address and play mode
- Fixed non-stop playing music when modifying the audio file address during the playback
- Fixed some DHCP issues after rebooting the device
- Fixed failing automatically downloads contacts after download interval
- Fixed failing to get a network address when using PPPoE
- Fixed some error when displaying the time on recording file
- Fixed the password input name shown as SSID in MAC&PEM

- Fixed the display name when the detected Bluetooth devices is using Chinese characters
- Fixed not displaying the second incoming call interface
- Fixed abnormality when unplugging/plugging the internet cable or switching networks
- Fixed some DTMF issue during call
- Fixed unable to delete a contact after 2000 contacts
- Fixed successfully saved the configuration when the IP, subnet mask, and default gateway are empty on when using Static IP

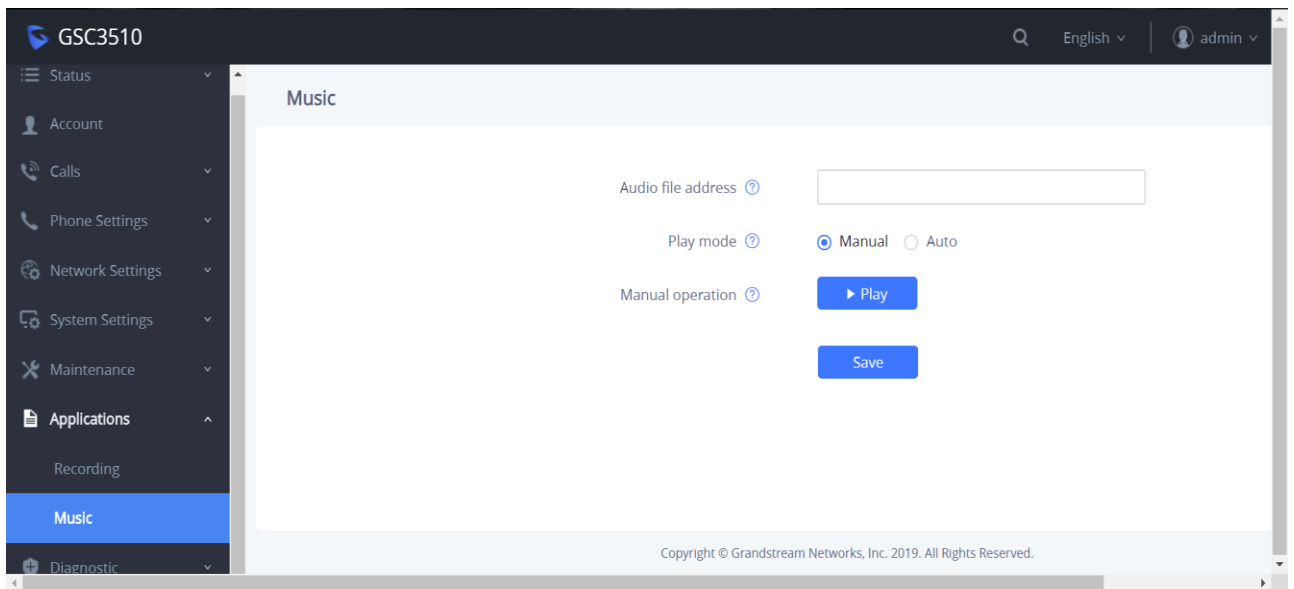

## NEW FEATURES OVERVIEW

This section lists major new features and describes how to use it from the user's point of view.

### MUSIC/RADIO STREAMING

- **Web Configuration**

This option can be found on the web UI under Applications -> Music.

- **Functionality**

Allow to stream a radio using RTSP address, for example: `rtsp://ip address/musicFile.ts`. Also, allow to play an audio file that is in RTSP format (.ts) or a RTSP format file converted from MP3 format.

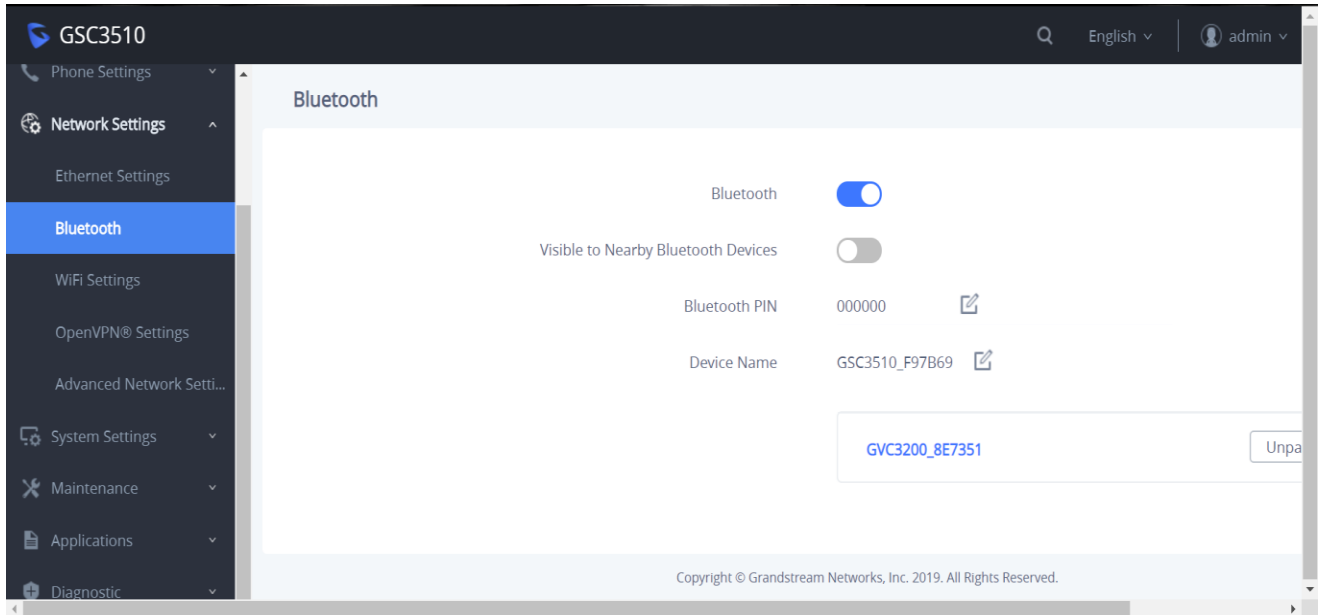

- **P-Value**

| P-Value | Description      | Value Range                             | Default |
|---------|------------------|---|---------|
| P953    | RTSP Server Path | See Config template for full value list |         |
| P22328  | RTSP Play Mode   |   | 0       |

## BLUETOOTH PIN CODE

- **Web Configuration**

This option can be found on the web UI under Network Settings -> Bluetooth -> Bluetooth PIN

- **Functionality**

GSC3505/GSC3510 added support a PIN Code when connecting with Bluetooth devices.

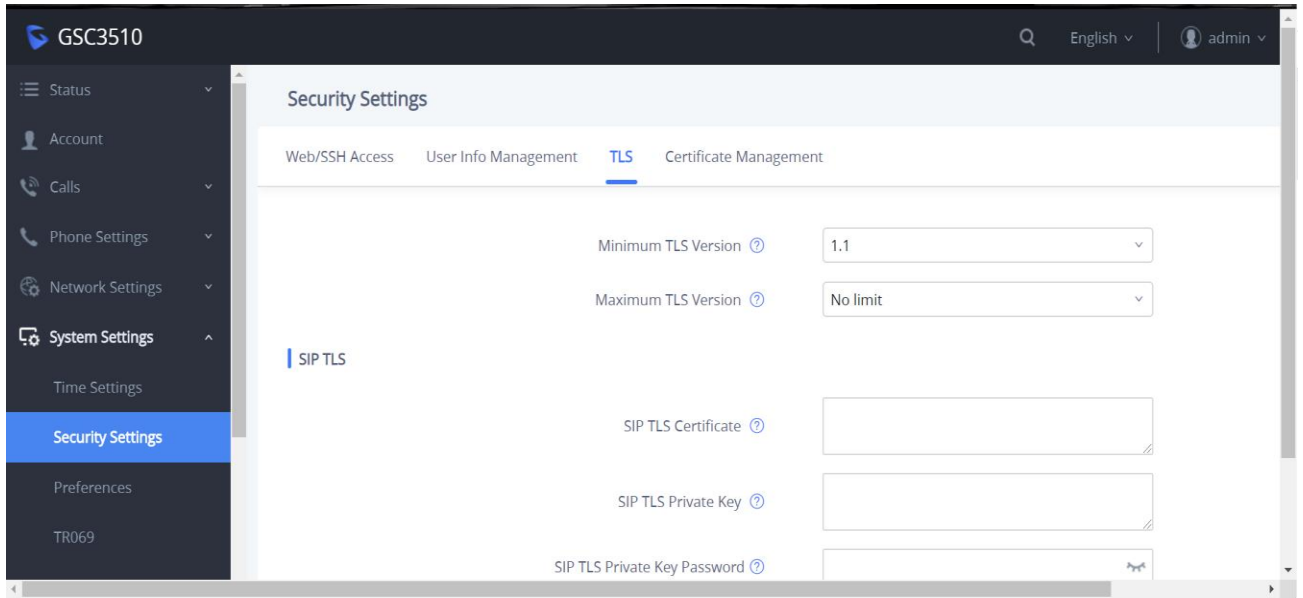

- **P-Value**

| P-Value | Description             | Value Range  | Default |
|---------|-------------------------|--------------|---------|
| P22291  | Bluetooth Pair Pin Code | Numbers only |         |

## MIN/MAX TLS VERSION

- **Web Configuration**

This option can be found on the web UI under System Settings -> Security Settings -> TLS -> Minimum TLS Version / Maximum TLS Version.

- **Functionality**

Allow the GSC3505/GSC3510 to accepting the connection from the lower TLS version.

- **P-Value**

| P-Value | Description         | Value Range                             | Default |
|---------|---------------------|---|---------|
| P22293  | Minimum TLS Version | See Config template for full value list | 11      |
| P22294  | Maximum TLS Version |   | 99      |
