BUG FIXES
- **[General]**
  - Fixed an issue with adding the ability to select the language during the installation with the Wave Desktop MSI installation file.
  - Fixed an issue with the Wave Desktop client still displays the "loading" status after the account switching operation fails and the user closes the pop-up window.
  - Fixed an issue with the Wave Desktop client displays two prompts after the account switching operation fails in some cases.
  - Fixed an issue with there is no verification code when re-entering the login password when the account switching operation fails due to changing the login password.
  - Fixed an issue with the account list displays incorrectly in some cases when switching accounts on the Wave Desktop client.
  - Fixed an issue with the account list should be displayed from the current login account instead of the last display location if the user exits the account list and open it again.

- Fixed an issue with a frame of meeting list from other accounts is displayed after switching accounts on the Wave Desktop client.
- Fixed an issue with the prompt for switching account list display an incorrect border.
- Fixed an issue with the memory usage increases too high after frequent login and logout on the Wave Desktop client.
- Fixed an issue with the Wave Desktop client user cannot customize applications to the sidebar in some cases.
- **[Shortcut]**
  - Fixed an issue with the ALT key + ">" key does work in Windows while the Wave Desktop is running.
- **[Meeting]**
  - Fixed an issue with the presenter's split screen window cannot display the presentation screen when sharing a document in a Wave meeting.
  - Fixed an issue with the operation button on the upper right corner of the split screen's demonstration window is permanently displayed.
  - Fixed an issue with the current host is also brought into the invitee field when scheduling a meeting to select all departments.
- **[VPK]**
  - Fixed an issue with the VPK configuration interface remains unchanged when UCM changes the call feature code.
- **[Chat]**
  - Fixed an issue with the voting and questionnaire icons on the chat button of the shared toolbar are too large.
  - Fixed an issue with the chat list displays that the WhatsApp conversation category is incorrect when a visitor initiates a conversation again in some cases.
- **[CTI]**
  - Fixed an issue with CTI configuration window style is inconsistent with Wave Desktop client UI in the dark mode.
  - Fixed an issue with the CTI entrance status displayed in the upper right corner is incorrect after switching accounts and signing in to the Wave Desktop client again.
  - Fixed an issue with the Wave Desktop client receives two incoming call pop-up windows under the CTI mode.
  - Fixed an issue with the prompt for reconnecting with the phone needs to be optimized in the CTI mode.

NEW FEATURES OVERVIEW

This section describes the major new features/changes introduced in the update and provides instructions for usage.

SCHEDULED MESSAGE

Users can set up scheduled messages as the screenshots show below:
