WAVE WEB VERSION 1.0.33.20

PRODUCT NAME

Wave Web Client

DATE

08/18/2026

CHANGES SINCE VERSION 1.0.33.14

BUG FIXES

- **[UI]**
 - Fixed an issue with call history not displaying CID name for outbound calls in certain cases.

WAVE WEB VERSION 1.0.33.14

PRODUCT NAME

Wave Web Client

DATE

05/13/2026

CHANGES SINCE VERSION 1.0.33.8

ENHANCEMENTS

- **[Chat]** Improved the chat search function. [CHAT SEARCH]
- **[Meeting]** Added the ability to join into the scheduled meeting through the meeting link in the notification email without entering the meeting password.
- **[AI]** GS AI Service begins accepting applications for internal testing. [GS AI SERVICE]

BUG FIXES

- **[Meeting]**
 - Fixed an issue with joining the scheduled meeting via the link in the email does not need to enter the meeting password.
- **[Chat]**
 - Fixed an issue with the latest message in the chat list should not display “Timed message sent successfully” prompt after signing in to the account again.
 - Fixed an issue with the interface displays an exception when the chat search results return an empty message.

NEW Features Overview

This section describes the major new features/changes introduced in the update and provides instructions for usage.

CHAT SEARCH

We improved the chat search function. When users search the chat, it will not query the chat contents.

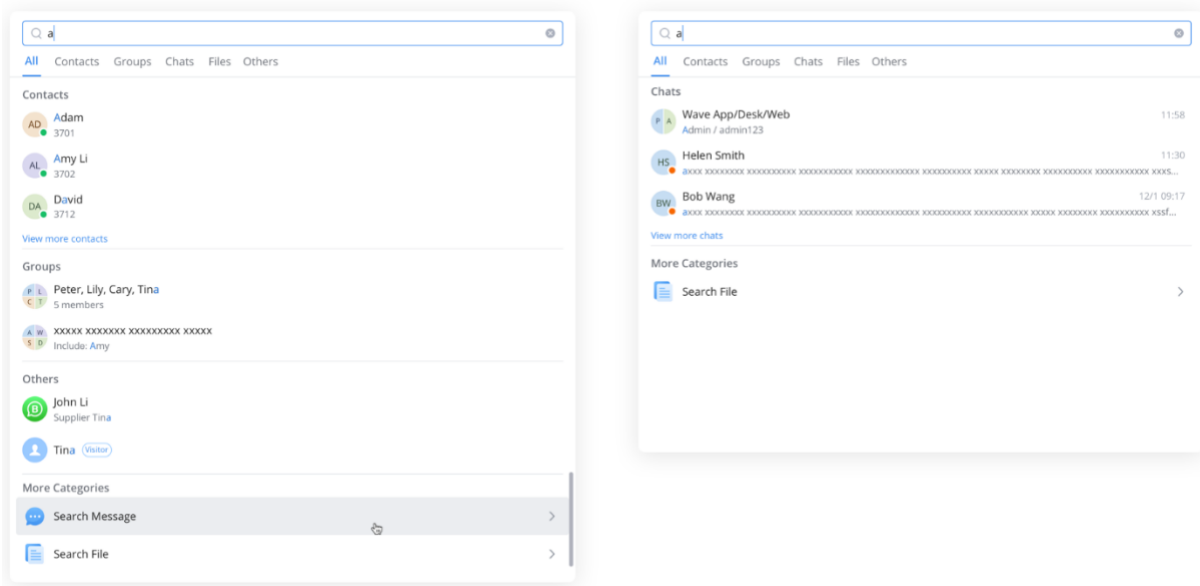

Figure 1: Chat Search Function

We also optimized the position of the pop-up window for the chat search box:

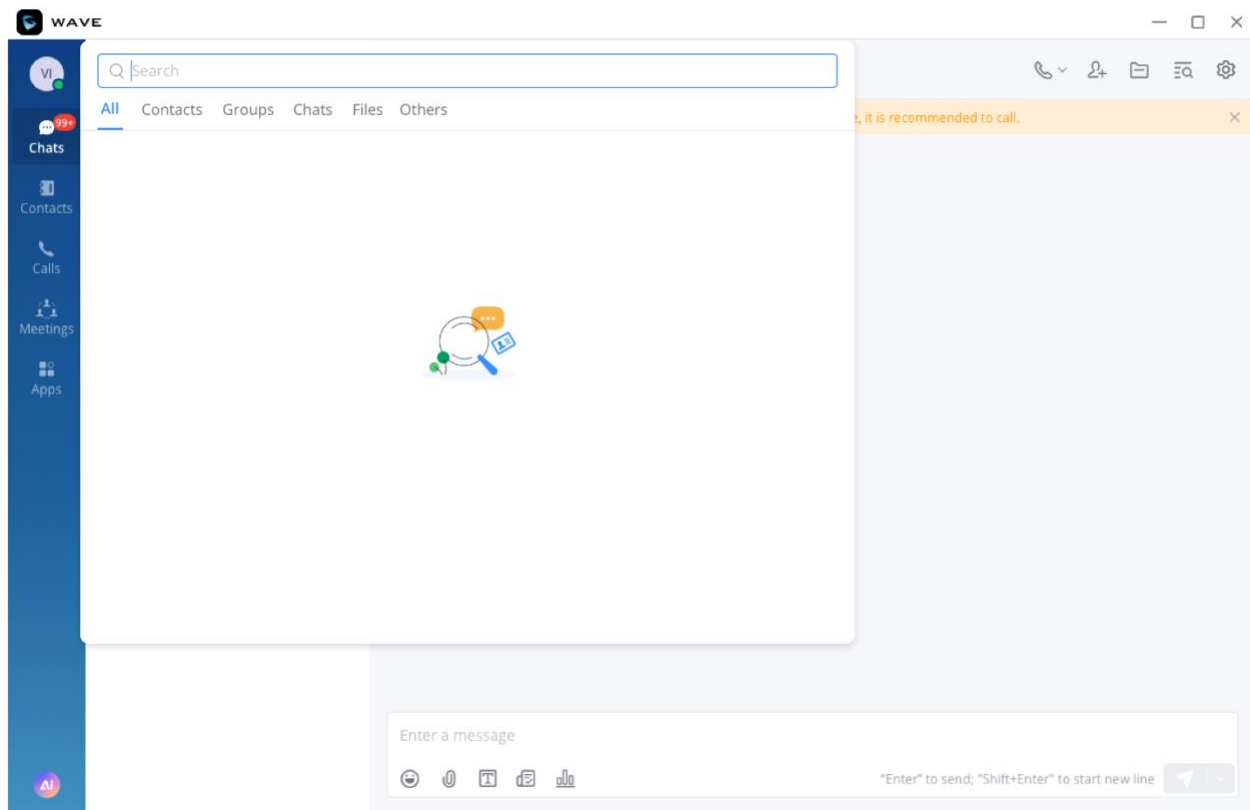

Figure 2: Chat Search Popup Window

GS AI SERVICE

Starting with 1.0.33.28, UCM has implemented and integrated AI into its offerings, enhancing productivity and providing additional value to enterprises with the following functionalities:

- Call/Meeting transcription & summary
- Voicemail transcription
- Voice prompt generation via TTS (text-to-speech)

The new AI services will require the RemoteConnect AI add-ons to use. Users can find the application entry in the Web UI of UCM and the GDMS account to apply for the GS AI service.

Please refer to the RemoteConnect pricing page under <https://cloud.grandstream.com/plans> for details.

WAVE WEB VERSION 1.0.33.8

PRODUCT NAME

Wave Web Client

DATE

03/11/2026

CHANGES SINCE VERSION 1.0.31.6

ENHANCEMENTS

- **[Chat]** Added the ability to send and manage scheduled messages. [SCHEDULED MESSAGE]
- **[Chat]** Added the ability to search group members, chat messages, and files in the Chat tab. [SEARCH CHAT INFO]
- **[General]** Added more options in Settings. [MORE OPTIONS IN SETTINGS]
- **[General]** Added the ability to match call history on the dial pad. [MATCH CALL HISTORY ON DIAL PAD]

BUG FIXES

- **[General]**
 - Fixed an issue with there is an ellipsis after the prompt in the QR code refreshes process.
- **[Recording]**
 - Fixed an issue with the download progress icon of the recording file is inconsistent with the UI.
- **[Meeting]**
 - Fixed an issue with the timer in the Wave meeting sometimes is running too fast and sometimes is running slow.
 - Fixed an issue with the user does not need to enter the meeting password if the user joins the meeting using the link in the meeting invitation email without changing the participant info.
 - Fixed an issue with the scheduled time for the onsite meeting room displays incorrectly in the Wave Web client.
- **[Add-in]**
 - Fixed an issue with the copy user button should not be grayed out when pre-installed add-in are for all users.
 - Fixed an issue with partial parameters of pre-installed add-in configuration are escaped.
- **[Call]**

- Fixed an issue with the call line on Switchboard displays incorrectly when the callee is parked in the parking slot.

NEW FEATURES OVERVIEW

This section describes the major new features/changes introduced in the update and provides instructions for usage.

SCHEDULED MESSAGE

Users can set up scheduled messages as the screenshots show below:

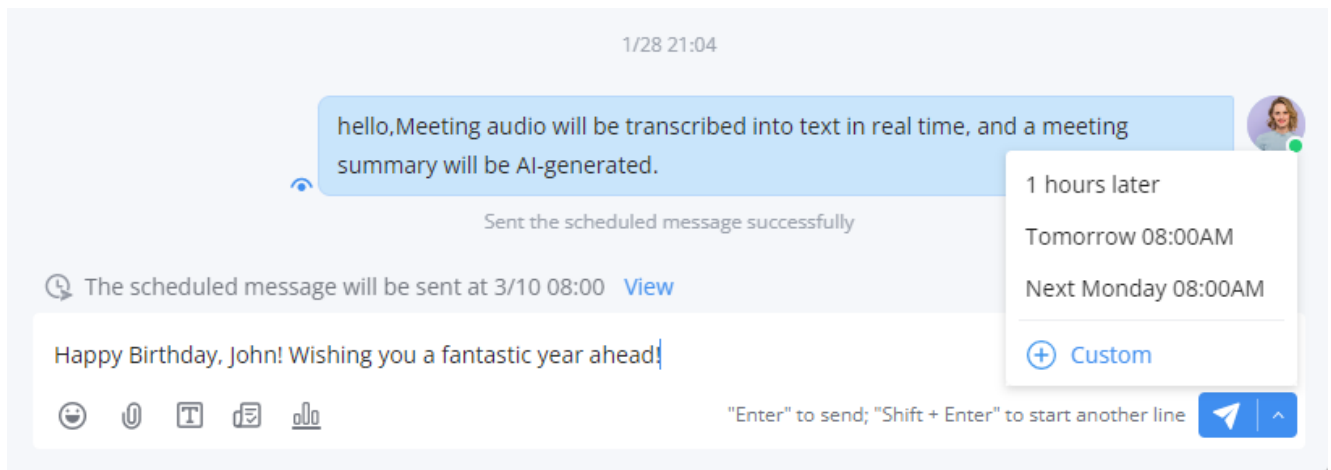

Figure 3: Create Scheduled Message

Users can view scheduled messages, and edit/cancel the scheduled messages.

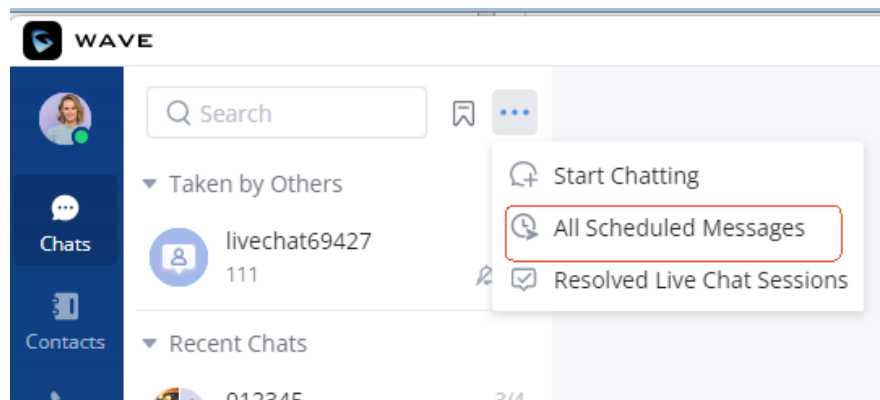

Figure 4: Manage Scheduled Message

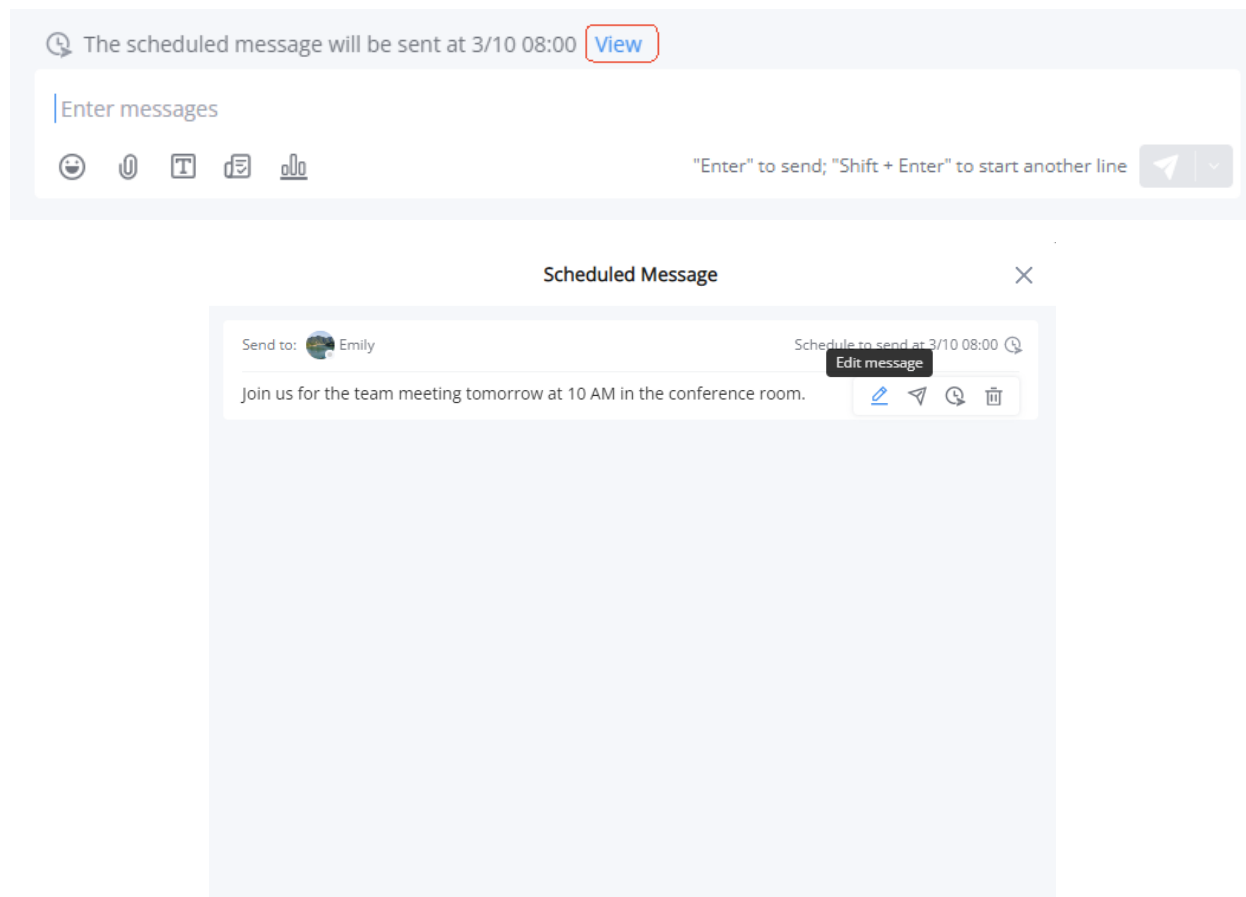

Figure 5: View Scheduled Message

SEARCH CHAT INFO

In the Chat tab, users can search for the group members of chats, chat messages, file names, etc. Users can click the “View More” option to view more search results.

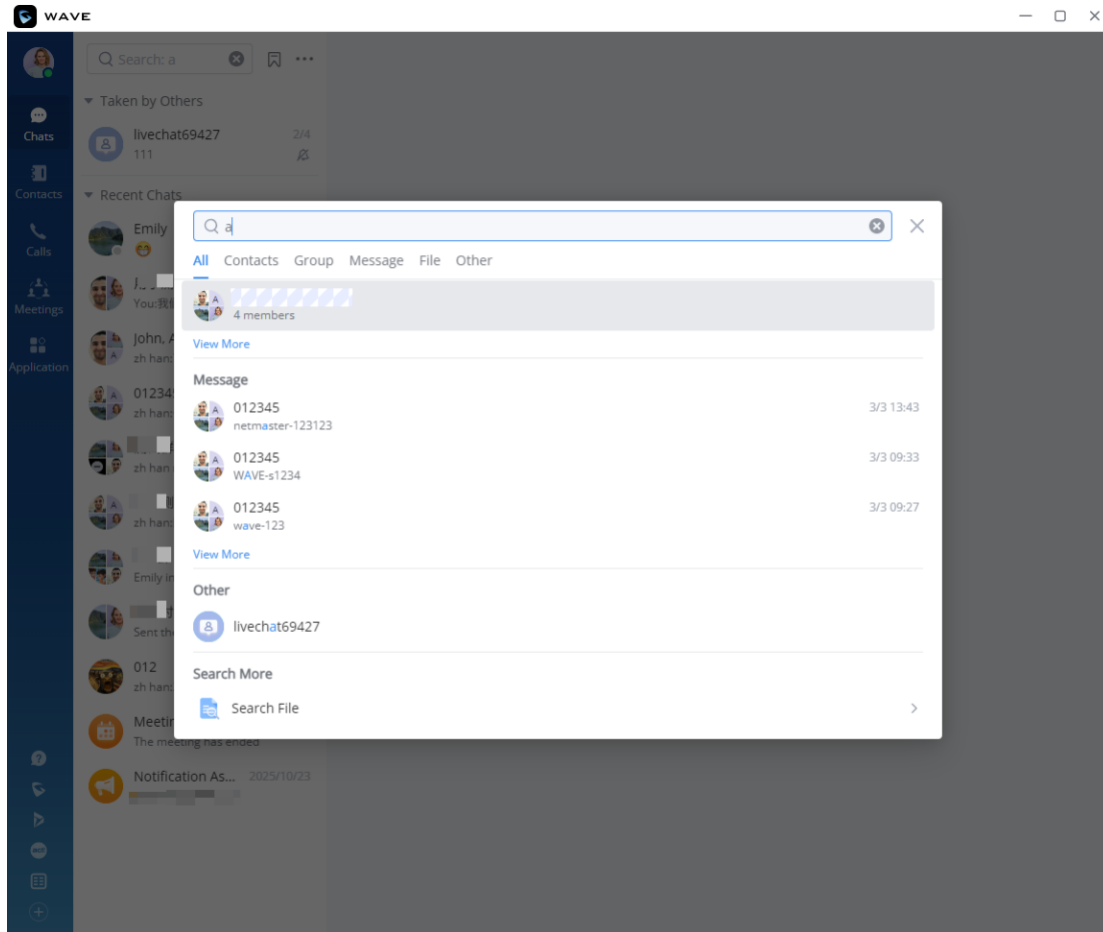

Figure 6: Search Chat Info

MORE OPTIONS IN SETTINGS

Microphone Detection: It allows users to play music simultaneously and detects duplex of headphones.

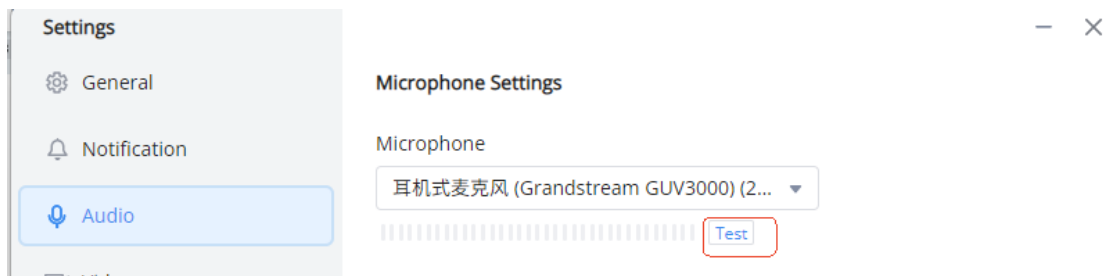

Figure 7: Microphone Detection

Added the “Spell Check” option:

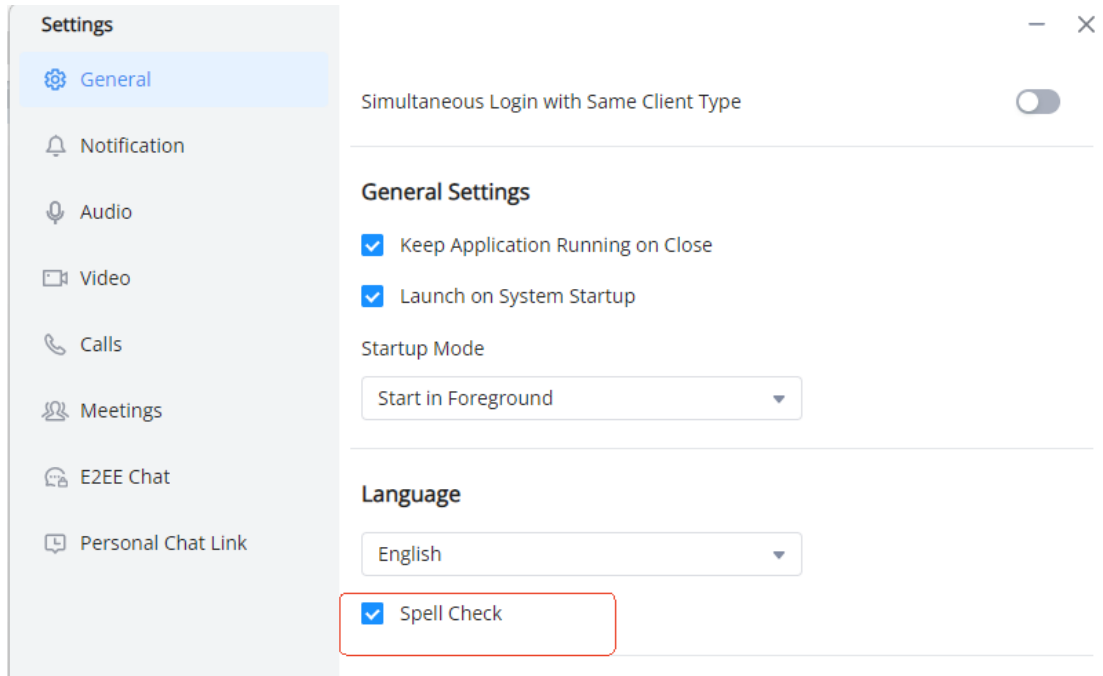

Figure 8: Spell Check

MATCH CALL HISTORY ON DIAL PAD

When using the dial pad to make calls, it supports searching for the contacts or numbers of the last 50 call logs.
