FIRMWARE VERSION 1.0.1.28

PRODUCT NAME

GHP630, GHP630W, GHP631, GHP631W

DATE

10/30/2024

FIRMWARE FILE INFORMATION

- Firmware file name: ghp630fw.bin
MD5: 002280787c013482c6a312b92253bac4

ENHANCEMENT

- Added ability to disable missed call and VM notifications[DISABLE MISSED CALL NOTIFICATION]

BUG FIX

- Removed unnecessary voltage warning when using some third-party PSU
- Fixed an issue where when trying to access voicemail, the phone prompts you to select an account even though there is only one active account
- Fixed an issue where the phone would sometimes fail to download the wallpaper on bootup due to reaching the download retry limit before the network is ready
- Fixed an issue where auto-answer would continue to use the handset instead of the speaker even after the handset is put back on-hook
- Fixed a security vulnerability

NEW FEATURE OVERVIEW

DISABLE MISSED CALL NOTIFICATION

Web Configuration

This option can be found under device web UI→Phone Settings→Call Settings.

Enable Missed Call Notification 

Functionality

Configures whether to enable the missed call and voicemail notifications.
