NEW FEATURES OVERVIEW

LINE LED COLOR SCHEME

- **Web Configuration**

This option can be found under device web UI→System Settings→Preferences→Display Control.

Line LED Color Scheme  Default Light up

- **Functionality**

Configures line key led color scheme.

- Default: off(idle)/green(in use)
- Light up: green(idle)/red(in use)

- **Pvalue**

Pvalue	Description	Value Range	Default
22362	<New Pvalue> Line LED Color Scheme	Value = 0; Default Value = 1; Light up	Default

FORCE REBOOT BY PVALUE PROVISIONING

- **Functionality**

Now with the new Pvalue 22421 (or alias “provision.config.forceReboot”) set to 1 in config file, phone will need to reboot if any change is applied by downloading the config file. Specifically following the process below:

1st time download:

- 1) Phone downloaded a config file (in any supported format) with P22421 set to 1 included.
- 2) Phone found there is change(s) comparing with current setting on the phone (Any valid Pvalue change, no matter it does need reboot to apply or not).

3) Phone will update to new setting (will not save P22421 itself) and will go into normal reboot process (eg: if there is active call, phone will wait until it is finished)

2nd time download:

4) After reboot, phone may download the same config file again (if the config file path did not change).

5) Phone checked the config file and found there is no Pvalue needed to be updated.

6) Phone will not reboot again.

- **Pvalue**

Pvalue	Description	Value Range	Default
22421	<New Pvalue> Provision config force reboot	Value = 0; No Value = 1; Yes	No

ALLOW MULTIPLE ACCOUNTS

- **Web Configuration**

This option can be found under device web UI→Phone Settings→General Settings→Public Mode.

Allow Multiple Accounts 

- **Functionality**

Now users are able to configure remaining account with a SIP account and be able to make/receive calls on the configured account even if the user is not logged in to the public mode.

- If set to "No", then after the user logs in to the public mode account on LCD, only the public mode account can be used on the phone even though there are other configured SIP accounts
- If set to "Yes," then after the user logs in to the public mode account on LCD, other configured SIP accounts on the phone can also be used. Note: This option requires enabling public mode to take effect.

- **Pvalue**

Pvalue	Description	Value Range	Default
8564	<New Pvalue> Allow Multiple Accounts	Value = 0; No Value = 1; Yes	No

DIAL NOW TYPE

- **Web Configuration**
