FIRMWARE VERSION 1.0.7.71

PRODUCT NAME

GRP2601(P), GRP2602(P/G/W), GRP2603(P), GRP2604(P)

DATE

08/21/2026

COMPONENT VERSIONS

Boot 1.0.1.35; Core 1.0.7.12; Prog 1.0.7.71

FIRMWARE FILE INFORMATION

- Firmware file name: grp2600fw.bin
MD5: cfce3555afa0c52b323c60258a513a04

CHANGES SINCE FIRMWARE VERSION 1.0.7.66

ENHANCEMENTS

- Added Two LCD languages support: Marathi and Hindi
- Improved BLF Call-Pickup LCD display with Zoom
- Added Turkish letters support in Q9 Input Method
- Added Call Settings shortcut selection on idle screen
- Added Support of "Accept-Language" SIP header in SIP messages [USE ACCEPT-LANGUAGE HEADER]
- Added Support to set the account selection mode when placing a call from the dialing interface [ACCOUNT SELECTION MODE FOR DIALING]
- Improved provisioning behavior to apply the configuration file server address specified in SIP NOTIFY messages

BUG FIX

- Fixed Device using call history entry on dial screen isn't using selected line to dial out
- Fixed Shortcut key for disabling call forwarding doesn't follow the feature codec customization

NEW FEATURES OVERVIEW

USE ACCEPT-LANGUAGE HEADER

- Web Configuration**

This option can be found under device web UI → Account X → SIP Settings:

Use Accept-Language Header ?

Disabled

- Functionality**

Whether to carry the Accept-Language header field in SIP Register and SIP Response for SIP INVITE. If configured as "Disabled", the header field will not be carried; if configured as "Auto", it will follow the terminal's "System Settings / Time and Language / Language / Display Language" configuration; if configured as a specific language, the Accept-Language header field will be set to that specified language.

- Configuration Parameters**

Web UI Configuration	Alias Parameter		P Number Parameter	
	Alias Name	Alias Values/Range	P Number	P Value/Range
Use Accept-Language Header	account.1.sip.header .acceptLanguage	String: ar – Arabic ca – Catalan cz – Czech da – Danish de – German el – Greek en – English es – Spanish fr – French he – Hebrew hi – Hindi hr – Croatian hu – Hungarian it – Italian ja – Japanese ko – Korean lv – Latvian mr – Marathi nl – Dutch pl – Polish pt – Portuguese	P95036 P95136 P95236 P95336 P95436 P95536	String: ar – Arabic ca – Catalan cz – Czech da – Danish de – German el – Greek en – English es – Spanish fr – French he – Hebrew hi – Hindi hr – Croatian hu – Hungarian it – Italian ja – Japanese ko – Korean lv – Latvian mr – Marathi nl – Dutch pl – Polish pt – Portuguese

Web UI Configuration	Alias Parameter		P Number Parameter	
	Alias Name	Alias Values/Range	P Number	P Value/Range
		ru – Russian se – Swedish sl – Slovenian sv – Slovak tr – Turkish uk – Ukrainian zh – Simplified Chinese zh-tw – Traditional Chinese Auto – Automatic (Default) Disable – Disabled		ru – Russian se – Swedish sl – Slovenian sv – Slovak tr – Turkish uk – Ukrainian zh – Simplified Chinese zh-tw – Traditional Chinese Auto – Automatic (Default) Disable – Disabled

ACCOUNT SELECTION MODE FOR DIALING

- Web Configuration**

This option can be found under device web UI → Phone Settings → Call Settings:

Account Selection Mode for Dialing ?

Auto

- Functionality**

This setting determines the account selection mode when placing a call through the dialing interface.

If set to "Auto", when dialing a number selected from call history or contacts, the system will use the account that was used in the previous call with that number or the account configured for that contact.

If set to "Current Account", when dialing a number selected from call history or contacts, the system will use the account that is currently displayed/selected in the dialing interface.

- Configuration Parameters**

Web UI Configuration	Alias Parameter		P Number Parameter	
	Alias Name	Alias Values/Range	P Number	P Value/Range
Account Selection Mode for Dialing	call.dial.useAccount	Auto (Default) CurrentAccount	P82363	Number: 0 – Auto (Default) 1 – Current Account
