 - [Android] Fixed an issue with read status in group chats.
 - [iOS] Fixed an issue with being unable to send .gif files.
 - [iOS] Fixed an issue with typing Vietnamese.

NEW FEATURES OVERVIEW

This section describes the major new features/changes introduced in the update and provides instructions for usage.

VIRTUAL PROGRAMMABLE KEYS (VPK)

Users can now set up and use VPKs for various features like Busy Lamp Fields (BLF), Event Lists, Speed Dials, Intercoms, Feature Code toggles, and more! The VPK feature is available under Settings.

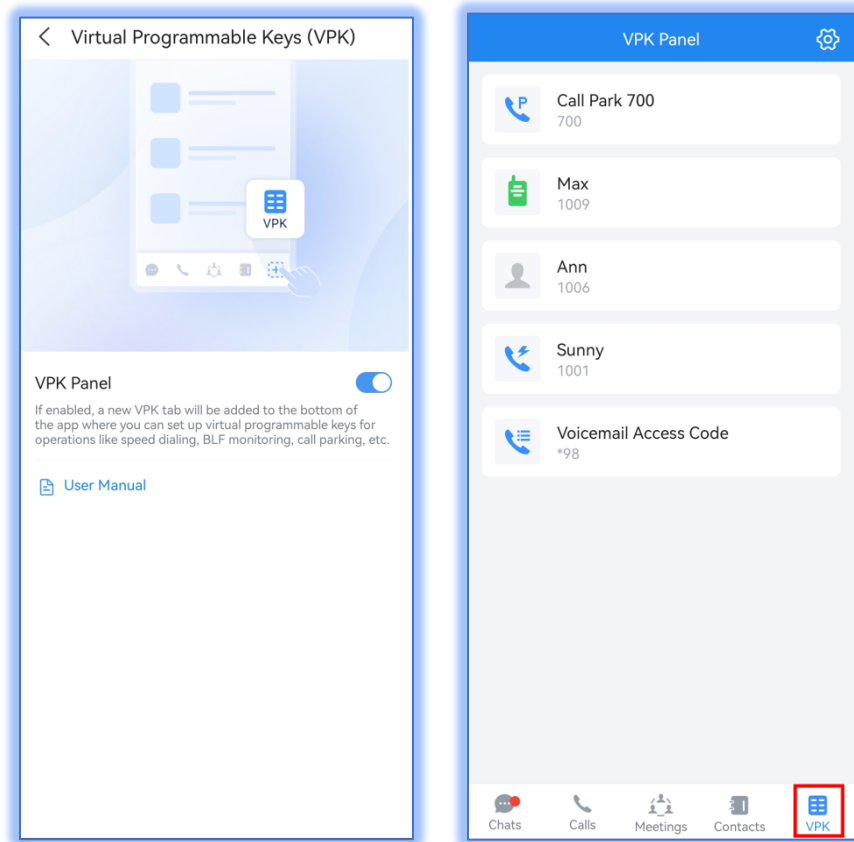

Figure 1 - VPK Panel

BIOMETRIC LOGIN SUPPORT

Quickly and securely log into Wave by using your device's fingerprint reader or facial recognition. Note: This setting must be enabled under Settings->Account Security Center.

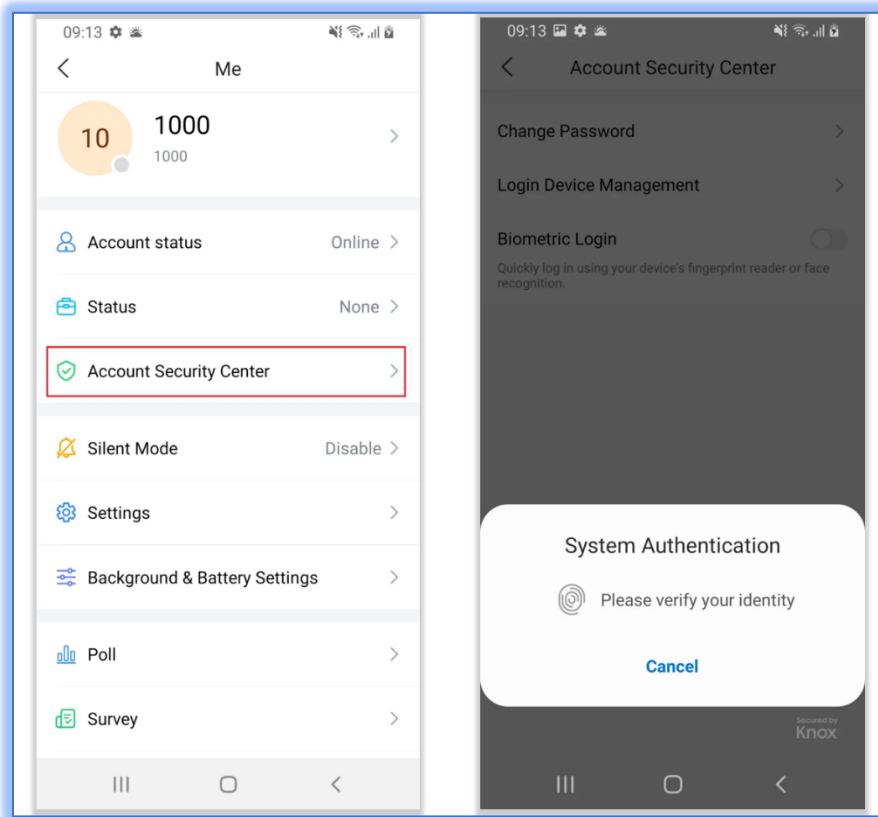

Figure 2 - Biometric Login

GOOGLE ASSISTANT & SIRI VIRTUAL ASSISTANT SUPPORT

Users can now use Google Assistant or Siri on their phones to start Wave calls. For example, saying “Please use Wave to call 1001” will open up the Wave app to call 1001.
