NEW FEATURES OVERVIEW

This section describes the major new features/changes introduced in the update and provides instructions for usage.

SCHEDULED MESSAGE

Users can set up scheduled messages as the screenshots show below:

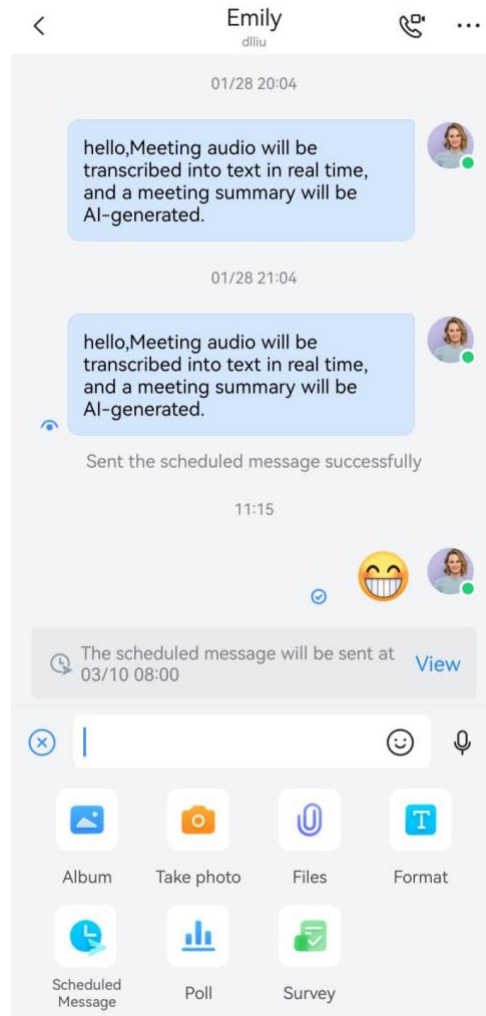

Figure 1: Create Scheduled Message

Users can view scheduled messages, and edit/cancel the scheduled messages.

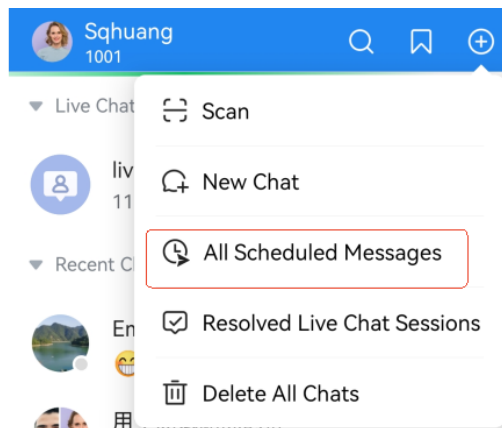

Figure 2: Manage Scheduled Message

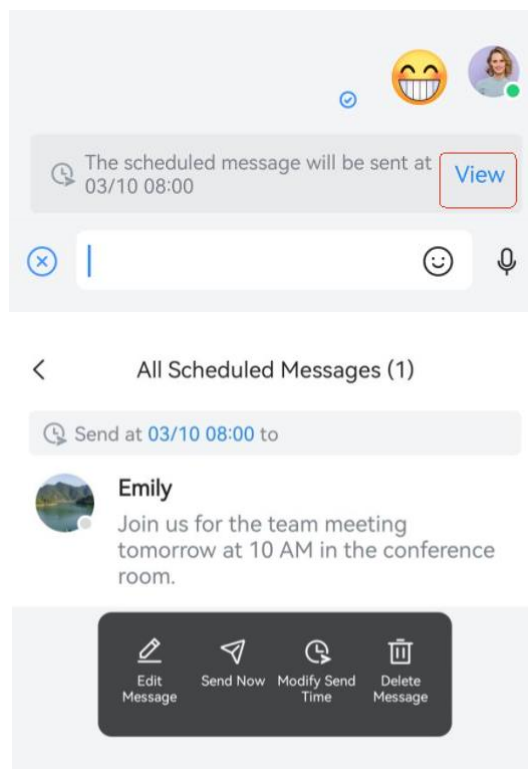

Figure 3: View/Edit Scheduled Message

SEARCH CHT INFO

In the Chat tab, users can search for the group members of chats, chat messages, file names, etc. Users can click the “View More” option to view more search results.

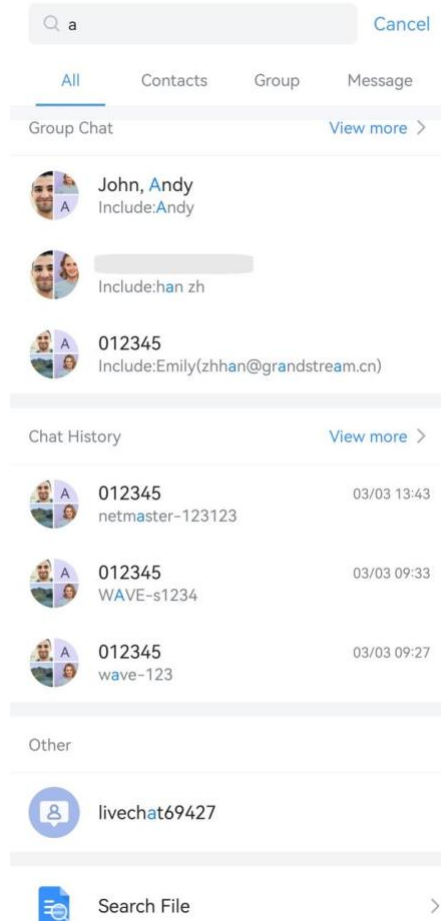

Figure 4: Search Chat Info

PERMISSION TO CONTROL SCREEN CAPTURE/RECORDING

UCM administrators can control the permissions of Wave users. They can disable the permission for screen capture and recording of the app. Once disabled, when users sign in to the Wave app, they will be unable to capture or record some interfaces of the Wave app (interfaces with privacy, such as configuration interface).

MATCH CALL HISTORY ON DIAL PAD

When using the dial panel to make calls, it supports searching for the contacts or numbers of the last 50 call logs.
