VERSION 1.0.35.7 (Android) / 1.35.7 (iOS)

PRODUCT NAME

Grandstream Wave Mobile

DATE

09/21/2026

IMPORTANT NOTE

- Grandstream Wave Mobile is available for Android and iOS mobile devices.
- The latest Wave Android app is available on the Google Play Store and can also be downloaded from <https://fw.gdms.cloud/wave/download/>
- The latest Wave iOS app can be downloaded from Apple's App Store.

CHANGES SINCE ANDROID VERSION 1.0.33.14 / iOS VERSION 1.33.14

ENHANCEMENTS

- **[Application]**
 - Added support for Wave login via SAML SSO / Windows AD / Google Workspace. These must be configured on the UCM server. To do so, please check the following UCM guides.
 - [SAML SSO Configuration Guide](#)
 - [Windows AD Configuration Guide](#)
 - [Google Workspace Integration Guide](#)
- **[AI] [BETA]**
 - Note 1: GS AI Beta signups are currently closed.
 - Note 2: UCM must be configured to enable AI features and corresponding user permissions.
 - The following AI-powered features are now available:
 - **Call/Meeting transcription and summary** - includes transferred calls, parked calls, and Follow Me calls. Transferers can opt to send the call transcript and summary so far to the transfer destination. Requires UCM63xx firmware 1.0.33.x or higher.
 - **Voicemail transcription** - Requires UCM63xx firmware 1.0.33.x or higher.
 - **Call/Meeting recording transcription and summary** - Recordings must be either under 1 GB in file size or under 10 hours in length. Stereo recordings are not supported. Requires UCM63xx firmware 1.0.35.x or higher.
 - **Translation of real-time transcription during calls and meetings** - Requires UCM63xx firmware 1.0.35.x or higher.

- Note 1: Translation will only occur for languages other than the user's designated language.
- Note 2: Translations will not be saved after a call or meeting ends, but they can be downloaded at any time during the call/meeting session.
- **[Calling]**
 - Added support for UCM call tags, which can be used to filter and organize specific types of calls. Users can assign tags to ongoing and finished calls. Requires UCM63xx firmware 1.0.35.5 or higher.
 - Users can now add notes to ongoing calls and finished calls (up to 512 characters). These notes can be viewed and edited by all related call parties if supported. Requires UCM63xx firmware 1.0.35.5 or higher.
 - Call history now supports searching via time range (max window is 3 months), call tags, call type, and dial type.
- **[Chat]**
 - Added support for the **Message Deletion Period** option available in UCM63xx 1.0.35.x firmware or higher. Once the configured time window has passed, users will no longer be able to edit and delete sent messages.
- **[WhatsApp]**
 - Added WhatsApp calling support. Requires UCM63xx 1.0.35.x or higher. For configuration, please use Wave Desktop's Management Portal or the UCM using our [WhatsApp Trunk Configuration Guide](#).

BUG FIXES

- **[iOS]**
 - Fixed a crashing issue when swiping left on a voicemail.
 - Fixed an issue with calls with certain country prefixes disconnecting after a few seconds.
